

MAP Growth RIT to Lexile

The Lexile Framework® for Reading can be used to match readers with text based on a student's reading ability. Use the chart below to see how a student's MAP® Growth™ reading score correlates to a student's Lexile® range. If needed, calculate a Lexile measure by adding 100L to the lower range value or subtracting 50L from the upper range value. For example, if the range is 20L to 170L then the Lexile measure is 120L.

A Beginning Reader (BR) code is given to readers and texts that are below 0L (e.g., BR150L). The lower the number following the letters BR, the more advanced the reader is. For example, a student with a Lexile measure of BR160L is a more advanced reader than a student with a Lexile measure of BR400L. To learn more about the Lexile Framework and find books at your student's reading level, visit Lexile.com.
